**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 and 14 to 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 states that the foam has a density of between 2.5 and 4.5 pounds, but does not states what the volume measurement for the density is, therefore the phrase is meaningless.

Claim 14 states in 5 "performing one of the following list", which is indefinite since it does not specify which one of the steps is to be performed, i.e., only one of the steps, all of the steps, or some of the steps and not the others. The metes and bounds of the claimed subject matter can not be ascertained from the language used.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3673

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 11, 12, and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Gibson (3,174,163). Gibson shows an adjustable pillow device that comprises a rectangular foam rubber core 12 that is placed within an outer cover 26 of a rectangular form. The case is open at one end 28 to allow for the insertion of the core, and can be considered as being "substantially longer" than the length of the core since this term can be broadly interpreted. The ends of the pillow can be rolled up to form a bolster used to cradle the side of the user's head, note that this inherently creates at least three differing configurations for the pillow (unrolled, rolled on one end, and rolled at both ends). It is presumed that the pillow would be provided with directions for its use.

Claims 14 to 16, as best understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ciske (5,535,467).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 to 6 and 18 to 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gibson (3,174,163). The use of viscoelastic foam in the production of the Gibson pillow would

Art Unit: 3673

have been an obvious step to the skilled artisan, since viscoelastic foam is a well known stock material in the art commonly used in body supports. The dimensions claimed are also within the ordinary level of skill in the art, since it is presumed that the skilled artisan would recognize and/or use whatever dimensions are need to produce a final product of a size needed for its intended use.

***Allowable Subject Matter***

Claims 7 to 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Beier, Shaharbani, Hui, Littleford et al, Scheurer, O'Sullivan, and Kjersem show reconfigurable pillows which are of particular interest.
